## **Abstracts**

Global Packaging Laminates Market is valued approximately USD XXX million in 2019 and is anticipated to grow with a healthy growth rate of more than 5 % over the forecast period 2020-2027. Packaging Laminates are films used to wrap products such as convenience foods, snacks and more. During Laminating two or more flexible packaging webs are joined together using bonding agents. These webs can be of films, paper, aluminum foils and other materials. The packaging laminates offer various benefits such as enhances the strength of the material protecting it during distribution and storage, protect the inside from outside deteriorating agents such as moisture and gas. These benefits drive the market for packaging laminates. Further, the expanding of these packaging laminates in the Food and beverage industry for items such as ready to eat products, Freeze food products and boil in bag pouches drives the demand for packaging laminates. According to Government of Canada, the food & beverage processing industry is the second largest industry in the country which accounts for 17% of the total manufacturing shipment along with 2% of the national gross domestic product. According to National Institute of Statistics and Geography (INEGI) as of 2017 there were over 187,347 economic units which include manufacturing plants and

distribution centers under the classification of Food and Beverage Manufacturing and Processing in Mexico. Also, in 2017 Mexico exported USD 26.76 billion of processed food of which USD 22 billion worth of processed food went to USA. Moreover, the increasing use of these laminates in insulation, medical and cosmetics further augments the demand for packaging laminates driving the market growth. However, strict environmental compliance impedes the growth of the market over the forecast period of 2020-2027. Although, introduction of eco-friendly and sustainable packaging materials presents a lucrative opportunity for the market. As in September 2020, Yeo Valley Organic, a UK based dairy brand joined the Enval's Zero waste to landfill scheme providing a process for recycling of laminate packaging. While, in the same period Nuva Healthcare collaborated with Constantia Flexibles to introduce recyclable flexible packaging solutions EcoLamPlus.

The regional analysis of global Packaging Laminates market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-pacific is the leading/significant region across the world in terms of market share owing to the large manufacturing and food processing industry in the region. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
