Abstracts

Global Packaging Machinery Market is valued approximately at USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than X% over the forecast period 2021-2027. Growing demand for consumer goods and rising adoption of automated machineries for packaging are creating demand in the market. Also, growing trend of e-commerce across the world and setup of e-commerce fulfillment centers are increasing need for packaging machineries. According to Statista, in 2020, retail e-commerce sales worldwide amounted to USD 4.8 trillion, which is estimated to reach USD 5.4 trillion by 2022. Also, in July 2020, Amazon India announced the establishment of 10 new fulfillment centers in the country. Furthermore, new product launches and increasing number of supermarkets which needs better packaging to increase shelf-life of their products are anticipated to fuel the demand for packaging machinery in near future. Such as, in 2019, Uflex launched a packaging solution called 'Asepto Eye' for the beverages segment. 'Asepto Eye' is a ripple concave lens and single lens technology that gives 3-D effects on the aseptic packs. However, high cost of packaging machineries and stringent government regulations may hinder the growth in coming years.

Asia Pacific is dominating the world market in terms of revenue and is also expected to show significant growth rate among North America, Europe, Latin America, and Rest of the World. Growing demand for consumer goods due to rising population and growing

adoption of automation in packaging are the factors creating demand in the region.
