Abstracts

Global Paint Spray Guns Market is valued at approximately USD 1.55 billion in 2022 and is anticipated to grow with a CAGR growth rate of more than 3.60% over the forecast period 2023-2030. A paint spray gun is a handheld tool used for applying paint or coatings to various surfaces. It operates by releasing paint or coating material in a fine mist or spray pattern, allowing for efficient and even coverage. Paint spray guns are commonly used in automotive refinishing, industrial applications, woodworking, and DIY projects. They typically consist of a trigger mechanism, nozzle, and paint reservoir or cup. By adjusting the spray pattern, paint volume, and air pressure, users can achieve different finishes and control the application of paint or coatings. Moreover, growing e-commerce platforms and rising industrialization are anticipated as market drivers. Furthermore, the rising automobile industry and increasing infrastructural development fuel the market space during the forecasted period 2023-2030.

According to India Brand Equity Foundation (IBEF) in 2022, The e-commerce sector in India has brought about significant changes in the way business is conducted, expanding various commerce segments such as B2B, D2C, C2C, and C2B. Notably, the D2C and B2B segments have experienced substantial growth in recent years. It is expected that India's D2C market may reach approximately USD 60 billion by FY27. Furthermore, the overall e-commerce market is expected to reach USD 350 billion by 2030, with an expected growth rate of 21.5% in 2022, amounting to USD 74.8 billion.

These statistics indicate the potential and positive trajectory of India's e-commerce industry, providing significant opportunities for businesses and contributing to economic development. According to the United Nations Industrial Development Organization (UNIDO) in 2022, the global manufacturing output consistently achieved a steady year-on-year growth rate ranging from 3 to 4 percent. Additionally, according to India Brand Equity Foundation in 2023, the Indian passenger car market was worth USD 32.70 billion, and it is expected to grow to USD 54.84 billion by 2027, with a compound annual growth rate (CAGR) of over 9% from 2022 to 2027. Furthermore, the electric vehicle (EV) market in India is expected to reach USD 7.09 billion by 2025. However, high operational & maintenance costs and a lack of skilled labor may hamper the growth of the market during the forecasted period of 2023-2030.
