Abstracts

Global Paper ShredderMarket is valued approximately at USD 1.95 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 8% over the forecast period 2021-2027. A paper shredder is a device used for cutting paper into either strips or fine particles. Also, they ensure the protection of sensitive and confidential information. Growing production of paper, security of confidential public and private data and growing awareness regarding disposal of waste are factors driving the market growth. For instance, according to Statista, the production of papers globally in 2018 increased to 419.72 million metric tons from 412.85 million metric tons in 2016. Furthermore, strict government regulation due to rising environmental concern are expected to fuel the growth in coming years. However, growing preference for soft copy of the documents may hamper the growth during forecast period

Asia Pacific, North America, Europe, Latin America, and Rest of the World are considered for the regional analysis of the global Paper Shredder Market. North America is the dominating region across the world in terms of market share due to rising number of commercial space and growing demand of shredding machines in countries such as U.S., Canada and others. Whereas Asia Pacific is anticipated to exhibit the highest growth rate over the forecast period 2021-2027 due to rising demand for shredders in government offices and private spaces in China and India..
