Abstracts

Global Parkinson's Disease Treatment Market is valued approximately USD XX Billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028.

Parkinson's disease is a disorder of the central nervous system that damage the nerve cell in the brain, which causes dopamine levels to drop, and affects movement, often including tremors, rigidity, bradykinesia, and postural volatility as its common symptoms. The rising prevalence of Parkinson's disease, the growing geriatric population, coupled with the increasing government funding for research and development activities are the primary factors that may surge the market demand across the globe. For instance, according to the Parkinson's Foundation, in the United States, in 2020, approximately one million people are suffering from Parkinson's disease (PD) that is more than the total number of populations which is diagnosed with multiple sclerosis, muscular dystrophy, and Lou Gehrig's disease (or Amyotrophic Lateral Sclerosis), and the amount is projected to reach 1.2 million individuals by the end of 2030. However, the availability of alternative treatments impedes the growth of the market over the forecast period of 2022-2028. Also, patent expiry of branded drugs and a strong drug pipeline are anticipated to act as a catalyzing factor for the market demand during the forecast period.

The key regions considered for the global Parkinson's Disease Treatment market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the presence of well-developed healthcare infrastructure, and increasing prevalence of the disorder. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the rising number of research and development activities, as well as supportive government policies would create lucrative growth prospects for the Parkinson's Disease Treatment market across the Asia-Pacific region.
