## **Abstracts**

Global Patient Handling Equipment Market is valued at approximately USD 10.2 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 2.3 % over the forecast period 2021-2027. Patient handling and mobility involve the use of assistive devices to ensure that patients can be mobilized safely and care providers avoid performing high-risk manual patient handling tasks. The increasing healthcare personnel awareness, increasing geriatric population has led to the adoption of Patient Handling Equipment across the forecast period. For Instance: According to the United Nations Database on World Population Ageing 2020, there will be a significant increase in the global geriatric population, from 727 million in 2020 to 1.5 billion by 2050. Also, with the rising demand for home healthcare services, the adoption & demand for Patient Handling Equipment is likely to increase the market growth during the forecast period. However, improper physical environment impedes the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Patient Handling Equipment market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading region across the world in terms of market share owing to the growing number of government and non-government initiatives regarding the adoption of safe patient handling equipment and the presence of a large number of patient handling equipment manufacturers in Europe. Whereas, Asia-Pacific is also anticipated

to exhibit the highest growth rate over the forecast period 2021-2027. Factors such as rising disposable income, rising population and improving healthcare infrastructure would create lucrative growth prospects for the Patient Handling Equipment market across Asia-Pacific region.
