Global Patient Registry Software Market is valued at approximately USD 1.2 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 15 % over the forecast period 2022-2028. Patient Registry Software enrolls, monitor, and enter data, safely from any device such as laptop, desktop, tablet smartphone. It is used to discover more clinical-focused registries and create a collaboration of physician partners. The rising patients' volume coupled with increasing cases of chronic diseases has led to the adoption of Patient Registry Software across the forecast period. For Instance: according to the Organization For Economic Co-operation and Development in 2020, the number of patients is increasing rapidly worldwide thus, the World Health Organization estimated an extra amount of approximately USD 370 billion per year for public healthcare. Increasing adoption of EHRs solutions enhances the market growth of Patient Registry Software. Also, with the growing number of accountable care organizations, the adoption & demand for Patient Registry Software is likely to increase the market growth during the forecast period. However, lack of skilled and trained Professionals impedes the growth of the market over the forecast period of 2022-2028.

The geographical regions considered for the global Patient Registry Software market analysis include Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific witnessed the highest growth across the world with respect to huge

market share due to the growing incidences of chronic diseases, increasing awareness about the EHRs, and innovation in healthcare systems. Whereas, North America is also estimated to attain a maximum growth rate during 2022-2028. Factors such as rising government initiatives for the advancement of healthcare infrastructure would create beneficial growth forecasts for the Patient Registry Software market across North America region.
