## **Abstracts**

Global Payment Security Market is valued at approximately USD 19.82 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 16.0% over the forecast period 2022-2029. Payment security is a method of protecting a customer, vendor, or client's transactions. It offers rules, norms, and security protocols to safeguard a customer or partner's privacy, transactions, and data. The rising incidences of data breaches, increasing number of fraudulent activities in e-commerce payment systems, and growing awareness of contactless payments are the key factors that are propelling the market demand across the globe.

The rising inclination towards digital payments is acting as a catalyzing factor for the growth of the market. According to Statista, in 2022, the overall transaction value in the digital payments segment is estimated to account for USD 8.49 trillion. Also, it is projected that the total amount is likely to reach USD 15.17 trillion by 2027 with a CAGR of 12.31% during 2022-2027. Accordingly, the increasing preference for digital payments is exhibiting a positive influence on the market demand in the global market. Furthermore, increasing usage of payment applications across various industry verticals, as well as growing technological developments is presenting various growth

prospects to the market in the forecasted years. However, the rising privacy and security concerns, along with the lack of skilled professionals stifle market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Payment Security Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America dominated the market in terms of revenue, owing to the rising number of payment frauds, along with the high penetration of digital payments. Whereas, the Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising inclination towards online digital payment among consumers, as well as the surging demand for payment security in the regional market.
