Global Peanut Allergy Treatment Market is valued approximately at USD xx Billion in 2020 and is anticipated to grow with a growth rate of more than xx% over the forecast period 2021-2027. Peanut Allergy Treatment is beneficial in reducing the implications of allergy caused by consuming peanuts. The global Peanut Allergy Treatment market is driven by growing prevalence of food allergies which supports the demand for allergy treatment. For instance, according to food allergy.org, every year around 200,000 people require emergency medical care for allergic reactions to food in the U.S. Also, 32 million Americans have food allergies. Likewise, according to worldallergy.org, food allergy directly affects around 2.5% of the general population globally. Another important driving factor is the rising advancements in healthcare to treat peanut food allergy effectively.
