Abstracts

Global Pediatric Ventilators Market is valued approximately USD XXX Billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2019-2026. Pediatric ventilators are specifically designed for children. As compared to adult breathing patterns, those in children are characterized by smaller tidal volumes (10mL/kg at birth) and an increased respiratory rate (40 bpm at birth, decreasing to 20 bpm at two years). Therefore, to deal with respiratory and other breathing problems occurred in children pediatric ventilators are used. COVID-19 significantly impacts in the growth of pediatric ventilators due to the emergence of coronavirus cases in infants and children. For instance: as per the Center of Diseases Control and Prevention (CDC), on April 2, 2020, Coronavirus pandemic has resulted in >890,000 cases and >45,000 deaths worldwide, including 239,279 cases and 5,443 deaths in the United States. Thus, rapid growth of COVID-19 in children across the globe and commendable role of pediatric ventilators in treatment of such children drives the growth of market over the forecast years. In Addition, increasing government regulations regarding safety measures of newborn children across the globe is expected to drive the growth of market over the forecast years. However, lack of skilled labors and high cost of pediatric ventilators are hampering the market growth over the forthcoming period.

The regional analysis of global Pediatric Ventilators market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the increasing prevalence of COVID-19 in adolescent population. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2026. Factors such as presence of favorable regulations regarding Childcare and increasing healthcare expenditure in the region would create lucrative growth prospects for the Pediatric Ventilators market across Asia-Pacific region.
