Abstracts

Global Peptide Synthesis Market is valued approximately USD 480.41 million in 2021 and is anticipated to grow with a healthy growth rate of more than 7.2% over the forecast period 2022-2028.

Peptide synthesis is the method of producing brief classifications of polypeptides by adding one amino acid at a time. This process is convenient for producing precise sequences that signify epitopes of several protein areas that may or may not be altered by mediates like phosphate groups. The growing adoption of peptides in pharmaceutical drugs, the rising number of developments for advanced automated peptide synthesizers, new product launches, and increasing investments for R&D activities are the major factors that may augment the market demand across the globe. For instance,

in August 2021, Novo Nordisk and Bachem Holding AG partnered to develop greener technology for solid-phase peptide synthesis (SPPS). Thereby, a rising number of strategic movements such as new product launches, mergers & acquisitions, geographical expansion by the leading companies is further supporting the market growth in the approaching years. However, the lack of a unified set of regulations for therapeutic peptides impedes the growth of the market over the forecast period of 2022-2028. Also, the development of personalized medicines is anticipated to act as a catalyzing factor for the market demand during the forecast period.

The key regions considered for the global Peptide Synthesis Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the increasing focus on developing personalized therapeutics and growing research in the fields of genomics and proteomics. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the high prevalence of chronic diseases, as well as increasing investments in life science research activities, would create lucrative growth prospects for the Peptide Synthesis Market across the Asia-Pacific region.
