Global Peracetic Acid Market is valued at approximately USD XX billion in 2022 and is anticipated to grow with a healthy growth rate of more than XX% during the forecast period 2023-2030. Peracetic acid is a strong and versatile oxidizing agent. It is a chemical compound with the formula CH_3CO_2H . Peracetic acid is a colorless liquid with a pungent odor, and it is highly reactive due to the presence of the peroxide and peroxy functional groups. The key factors driving the market growth are growing demand for water treatment procedures, rising focus on food sterilization and disinfection, and expansion in healthcare & life sciences that are anticipated to support the market growth during the projected period 2023-2030.

Additionally, the growing water and wastewater treatment sector has been a significant driver for the Peracetic Acid Market. Peracetic acid is a potent disinfectant and sterilization agent. In water and wastewater treatment, it is used to eliminate or control the growth of microorganisms such as bacteria, viruses, and fungi. As the demand for effective disinfection in water treatment plants increases, peracetic acid becomes a preferred choice due to its efficacy and ability to break down into environmentally friendly byproducts. According to Statista, in 2022, the global water and wastewater treatment market was valued at USD 301.77 billion, and it is anticipated to reach USD 536.41 billion by 2030. As a result, the growing water and wastewater treatment is anticipated to support the market growth. Moreover, growing awareness of eco-friendly disinfectants and emerging applications across various industries is anticipated to create a lucrative opportunity for the market over the projected period. However, the

high cost and low awareness about benefits stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global Peracetic Acid Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. North America dominated the market in 2022 owing to the growing water and wastewater treatment plants, the presence of key market players, and the growing food and beverages industry. Whereas, the Asia Pacific is expected to grow with the highest CAGR over the forecast period, owing to factors such as the expansion in healthcare and pharmaceutical sectors, growing awareness of environmental benefits, and increasing demand in food and beverage industry.
