Abstracts

Global Perfusion Bioreactors Market is valued at approximately USD XX million in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. The adoption of capital-intensive combination technologies is being fueled by increased spending in life sciences R&D. In addition, technology transfer has resulted in the development of completely automated bioprocessing analyzers. Due to their high throughput and efficient use of limited resources, manufacturers have increased their usage of bioprocess equipment. Technology transfers have a significant influence on biopharmaceutical businesses in emerging economies, as they boost production capacity and lower costs. Several key manufacturers are taking strategic initiatives to expand their presence in the market. For instance, in February 2021, Thermo Fisher Scientific acquired Mesa Biotech, a privately held point-of-care molecular diagnostic company. Similarly, Sartorius completed the acquisition of Danaher Corporation's selected life science operations in 2020. However, cost of perfusion bioreactors is very high which may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global Perfusion Bioreactors Market is considered for the key regions such as Europe, North America, Asia Pacific, Latin America, and Rest of the World (ROW). North America is the leading region across the world in terms of market share due to increasing research & development (R&D) of novel biologics and new approvals of biological products in the region. Whereas Europe is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to increasing

adoption of perfusion bioreactors for industrial product manufacturing for products in the U.K.
