Global Pericarditis Treatment Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Pericarditis is an inflammation of the pericardium. It can be defined as swelling and irritation of the thin, saclike tissue surrounding the heart named pericardium. Pericarditis generally occurs due to respiratory or digestive system infection. The most common symptom of acute pericarditis is a sharp, stabbing chest pain. The growing prevalence of cardiovascular diseases and increasing incidences of recurrent pericarditis as well as favorable initiatives from regulatory authorities are factors that are accelerating the global market demand. For instance, according to World Health Organization (WHO) estimates – during 2019, around 17.9 million people around the world succumb to cardiovascular diseases (CVDs), witnessed for around

32% of all global deaths occurred in 2019. Moreover, as per American College of Epidemiology – in United States Recurrent Pericarditis (RP) population is estimated at 36,500 with 19,500 incident cases annually equating to 6.0/100,000 incidence and prevalence rate of 10.9/100,000 incidence. Furthermore, Recent treatment approvals from regulatory authorities would influence the growth of Pericarditis Treatment Market. For instance, in March 2021, US based Regeneron Pharmaceuticals, Inc. received FDA approval for its Arcalyst (rilonacept) injection to treat recurrent pericarditis in adults and children 12 years and older. Also, growing number of geriatric individuals coupled with surging healthcare infrastructure in emerging economies are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, stringent rules and regulations from government authorities and high treatment cost impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Pericarditis Treatment Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing development of pericarditis treatment solutions and presence of leading pharmaceuticals players in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as the thriving growth of healthcare sector and rising geriatric population in the region, would create lucrative growth prospects for the global Pericarditis Treatment Market across the Asia Pacific region.
