Abstracts

Global Peristaltic Pumps Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Peristaltic Pump is a pump in which fluid is forced along by waves of contraction produced mechanically on flexible tubing. The rising investment in the expansion of water & wastewater treatment plants worldwide and increasing production of pharmaceuticals across the globe has led to the adoption of Peristaltic Pumps across the forecast period. For Instance: as per the IBEF, The International Finance Corporation plans to invest about \$150 million in water management and water treatment projects in India. Also, with the miniature peristaltic pumps, the adoption & demand for Peristaltic Pumps is likely to increase the market growth during the forecast period. However, frequent replacement of hoses and tubes impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Peristaltic Pumps market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the significant region across the world in terms of market share owing to technological advancements as equipped with flow-driven technology that supports precision dispensing. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as APAC being the production hub for pharmaceutical products and medical equipment and growing manufacturing and other

end-use industries in the region would create lucrative growth prospects for the Peristaltic Pumps market across Asia-Pacific region.
