Abstracts

Global Pesticide Free Agriculture Products Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Pesticide-free food products are those that are grown, stored, and packed without the use of synthetic pesticides. These products are minimally processed, preserving their nutritional value. The increasing demand for organic food products and growing disposable income are key factors driving the market growth.

Over the years the demand for organic food products is increasing hence creating strong demand for Global Pesticide Free Agriculture Products Market. For instance – as per Statista – in 2021, the global organic food market was valued at approximately USD 227.1 billion, and the market is projected to grow to USD 437.4 billion by 2026. Also, rising number of health-conscious individuals and growing emergence of organic food startups would create lucrative growth opportunities for the market over the projected period. However, high costs of Pesticide Free Agriculture Products hinder the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Pesticide Free Agriculture Products Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the

dominance of branded products and the increasing number of health-conscious individuals in the region. Whereas Asia Pacific is expected to grow with the highest CAGR during the forecast period, owing to factors such as rising number of startups offering pesticide free food products as well as increasing spending on organic products in the region.
