Abstracts

Global Pet Food Ingredients Market is valued approximately USD 36.2 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 6.6 % over the forecast period 2020-2027. Pet foods can be plant or animal based, intended for consumption by pets, which mainly contains vitamins, proteins, carbohydrates, minerals, fats, and certain amounts of preservatives. Pet food ingredients contains grains & vegetables, mMeat and others, each ingredient plays a vital role in providing enrichment to the animal body. COVID-19 has impacted the global pet food ingredients market as manufacturing operations and supply chain are at halt. The increase in pet expenditure with a substantial rise in pet food expenditure, switch from mass products to organic pet food ingredients and acceptance of insect-based protein and oil by pet owners are the few factors responsible for growth of the market over the forecast period. Furthermore, the rising advancements and other strategic alliance by market key players will create a lucrative demand for this market. For instance: on 02nd January 2020, Darling Ingredients acquired US based EnvironFlight LLC. This purpose of this acquisition is to accelerate the ability to create higher value, sustainable proteins for the agriculture and companion animal feed industries. However, non-uniformity of regulations hindering international trade and limited availability of ingredients and price sensitivity are the major factor restraining the growth of global Pet Food Ingredients market during the forecast period.

The regional analysis of global Pet Food Ingredients market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World.
