Abstracts

Global PET Packaging Market is valued approximately USD XX billion in 2022 and is anticipated to grow with a healthy growth rate of more than 7.7% over the forecast period 2023-2030. Polyethylene terephthalate (PET/PETE) stands as a versatile chemical compound widely employed across diverse industries. From food and beverage packaging, including preserved foods and fruit juices, to healthcare, consumer goods, cosmetics, electronics, pharmaceuticals, and even cinematography, PET finds myriad applications. Its sustainability credentials are notable, as PET is environmentally friendly and poses minimal harm to ecosystems. The market growth is driven by key factors such as increase in demand in food and beverage industry, and expanding e-commerce sector.

The food and beverage industry stands as a key arena for PET packaging, finding widespread application in the packaging of various beverages, including carbonated soft drinks, juices, milk, and water. According to Statista, PET serves as the primary material for manufacturing plastic bottles used in beverages and other common products. In 2020 alone, the global demand for PET reached an impressive 27 million metric tons.

Looking ahead, projections suggest a significant surge in global PET demand, with estimates indicating a rise to 42 metric tons by 2030. However, increasing regulations regarding the usage of plastic stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global PET Packaging Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. Asia Pacific is dominating region in the global PET packaging market and expected to be the fastest growing region in the forecast years, the market is lifted by its expansive consumer base and the widespread adoption of PET packaging for various food and beverage products. The burgeoning e-commerce industry in the region presents lucrative avenues for market expansion, further fueling growth prospects.

Recent Developments in the Market:

In January 2022, Sonoco Company responded to unprecedented inflation in crucial raw materials, transportation, packaging, labor, and other manufacturing

costs by announcing a 9% increase in prices for CPET (crystallized polyethylene terephthalate) thermoformed plastic trays and bowls.

In 2022, Berry and TotalEnergies forged a collaborative effort aimed at reducing landfill waste and enhancing the circularity of food packaging. This partnership enables Berry to access certified circular polymers from TotalEnergies, derived from an advanced recycling process for post-consumer plastic waste. This innovation facilitates Berry's integration of more recycled plastic into the packaging of its food and beverage as well as healthcare products, addressing sustainability challenges in the industry.
