Abstracts

Global Petroleum - Fuel Dyes and Markers Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. fuel dyes and markers refer to chemical additives that are added to certain petroleum products and which plays an important role in differentiating differ types of fuels. Dyes are added to fuels in some countries for statutory, tax and safety reasons. For instance, fuel used for heating is taxed at a different rate than fuel used in vehicles. Heating oil and diesel fuel are very similar in appearance. To avoid confusion, heating oil is labeled with heating oil dye (known as Euro marker) consisting of a red dye and a marking substance known as Solvent Yellow 124. Growing aviation industry in post covid era and rising government regulations are key drivers for the growth of Petroleum - Fuel Dyes and Markers market. For instance, according to The International Air Transport Association (IATA)- global demand for air cargo increased by 6.9% in 2021, compared to 2019 (pre-covid levels) and 18.7% compared to 2020 following a strong performance in December 2021. Also, in

December airlines in the Asia Pacific region showed an 8.8% increase in international demand compared to 2019. Also, with the increasing demand for gasoline and aviation fuels and also, due to rising agriculture & construction activities, the adoption & demand for Petroleum - Fuel Dyes and Markers is likely to increase the market growth during the forecast period. However, increasing focus over environmental concern impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Petroleum - Fuel Dyes and Markers Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to growing cargo transportation and presence of leading market players in the region. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such increasing demand for gasoline and rapid industrialization in the region would create lucrative growth prospects for the Petroleum - Fuel Dyes and Markers Market across Asia-Pacific region.
