## **Abstracts**

Global phase transfer catalyst market to reach USD 1368.6 million by 2025.

Global phase transfer catalyst market is valued at approximately USD 947.1 million in 2017 and is anticipated to grow with a healthy growth rate of more than 5.4 % over the forecast period 2018-2025. Phase transfer catalyst market is continuously growing across the world over the coming years. Phase-Transfer Catalyst are used for facilitating a reactant in one phase to another phase where actual reaction takes place. It is utilized for special form of heterogeneous catalysis. These catalysts are responsible for accelerating the reaction in order to attain higher conversions or yields and also reduces the byproducts. Phase-transfer catalysts are widely used in green chemistry as they reduce the need for organic solvents.

Increasing adoption of green chemistry in organic synthesis is raising the demand of phot-transfer catalysts thereby driving the global phase-transfer catalyst market during the forecast period. Vertical and backward integration in market is anticipated to offer immense opportunities to the marketers over forecast years. However, industrial catalysts are easily available and have lower costs than phase-transfer catalysts thereby restraining their adoption and restricting the market growth to some extent. Also, the recent technological advancements to reduce the catalyst consumption rate is emerging as major challenge for the manufacturers and thus to global phase-transfer catalyst market.

The regional analysis of global phase transfer catalyst market is considered for the key

regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to rising demand of Phase Transfer Catalyst in chemical manufacturing industries. Europe also contributes a satisfactory growth in the global phase transfer catalyst market due to increasing demand of various chemicals on a large scale. Asia-Pacific is also anticipated to exhibit higher growth rate / CAGR over the forecast period 2018-2025 due to growth in chemical manufacturing industries in developing countries such as India, China and Japan.
