## Abstracts

Global Phospholipid Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Phospholipids are an essential part of biological membranes. Phospholipids can be derived from all kinds of living plants or animals. Some of the good sources of phospholipids are eggs, organ meats, lean meats, fish, cereal grains, and oilseeds. Phospholipids are also helpful in absorption of fat-soluble nutrients, like omega-3 fatty acids. Natural phospholipids contain relatively high amounts of linoleic acid which provides smoothness and elasticity to the skin. Growing cosmetics industry and rising demand for organic food products are key drivers for the growth of Phospholipid market. For instance, according to Good Food Institute (GFI) USA- In the year 2020 sales of plant-based food products in USA estimated at USD 7 billion, an increase of over 27% from sales of USD 5.5 billion during the 2019 period. Also, In February 2021 Lipogen, an Israel-based ingredient manufacturer has launched phospholipid formula CognoLipid in North America. It helps in reducing high chronic stress by balancing the stress hormone, called cortisol. This move will help expand its presence in North America. Also, with the increasing application in pharmaceuticals & Nutraceuticals industry, the adoption & demand for Phospholipid is likely to increase the market growth during the forecast period. However, volatile pricing of raw material impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Phospholipid market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to growing cosmetics industry and increasing demand for plant-based products in the region. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such increasing demand for natural cosmetics products and growing adoption of organic food products in the region would create lucrative growth prospects for the Phospholipid market across Asia-Pacific region.
