Abstracts

Global Photo initiator Market is valued approximately at USD 1.6 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 10.3% over the forecast period 2021-2027.

Photo initiators are majorly used for operations that require UV transparency, low residue on evaporation and high purity.

Rising demands of water-soluble additives, growing need for environment-friendly alternative for VOCs compound and rising demand of photo initiator in end-use industries are the factors which are driving the growth of Photo initiators market.

Furthermore, Development of non-toxic photo initiators for procedures in the dental sector will be anticipating the growth of market in forecasted period. For instance, In April 2021, Eutec Chemical Co., Ltd. key market player partnered with Eustar Functional Material Technology, Inc. to launch additives for blue light absorbers, mainly for the automotive and electronic sectors. However, defects in finishing due to irregular exposure to light may impede market growth over the forecast period of 2021-2027.

Global Photo initiator market analysis on basis of region which includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is a significant region across the world in terms of market share due to presence of largest manufacturing units of photo initiator in the region. Whereas Europe is anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to increasing sales of Photo initiators in the region.
