## **Abstracts**

Global Pigment Dispersion Market is valued approximately at USD 26.2 billion in 2019 and is anticipated to grow with a growth rate of more than 3.9% over the forecast period 2020-2027. The pigment dispersion is a method to transfer color to different substrates in the manufacturing, automotive, and packaging industries. It is widely used in paints and coatings industry which pose significant growth prospects for suppliers in the market. The rise in paints and coating industries, growing use of colored packaging products for food packaging, and increased usage of automotive coatings to satisfy the requirements of an ever-expanding automotive industry are the few factors responsible for growth of the market over the forecast period. For instance, as per Statista, the global market value of paints and coating industry was USD 147.2 billion in 2020 and is projected to rise to USD 179.4 billion in 2025. Similarly, the total global market volume of paints and coatings was amounted to 9 billion gallons in 2015 and has risen to 9.8 billion gallons in 2019. Moreover, rising number of automotive vehicles across the world will create a lucrative demand for the pigment dispersion market over the forecast period. As per Statista, the Indian production volume of light commercial vehicles was 269.45 thousand in 2009 and has risen to 663.19 thousand in 2018. Also, according to Statista, around 8.76 million motor vehicles were produced in North America in 2009 and has risen by 16.8 million production of motor vehicle in 2019. However, the unavailability of raw materials and strict environmental legislation is the major factor restraining the growth of global Pigment Dispersion market during the forecast period.

The regional analysis of global Pigment Dispersion market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the
