## Abstracts

Global Piperidine Market is valued at approximately USDXX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Piperidine (CH<sub>2</sub>)<sub>9</sub>NH is a colorless liquid with an odor described as obnoxious, and generally like amines. Piperidine is gaining huge traction in applications such as pharmaceuticals, chemical manufacturing catalysts, and the production of fertilizers and pesticides. Also, it is highly used as a chemical reagent and building block in the synthesis of particular organic compounds. The surging demand from the pharmaceutical industry, growing agrochemicals consumption, coupled with the rising need for drugs for aging-related and chronic diseases are the major factors soaring the market demand across the globe. For instance, according to the Indian Brand Equity Foundation (IBEF), in India, the pharmaceutical market is accounted for nearly USD 42 billion in 2021 and it is projected that the market is substantially developing and reach around 130 billion by 2030. Accordingly, the exponential growth of the pharmaceutical sector is bolstering the demand for piperidine, which is impelling the growth of the global market in the near future. However, several health risks associated with piperidine, and volatility in the prices of the raw materials impede the growth of the market over the forecast period of 2022-2028. Also, the emergence of piperidine and its derivatives as antiproliferation and antimetastatic drugs and rising spending on agricultural pesticides and fertilizers are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Piperidine Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the

leading region across the world in terms of market share owing to the rising investment in research and development activities. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the growth of the pharmaceutical industry, as well as increasing agricultural activities in regions like India and China, would create lucrative growth prospects for the Piperidine Market across the Asia-Pacific region.
