Abstracts

Global Plant Derived Sugar and Synthetic Sugar Market is valued approximately at USD xx Billion in 2020 and is anticipated to grow with a healthy growth rate of more than xx% over the forecast period 2021-2027. Plant derived sugars are extracted from natural sources such as sugar crops, cereals, milk, fruits, and synthetic sugars are made in laboratories, and both are extensively used by the consumers as healthy sugar alternatives. The global Plant Derived Sugar and Synthetic Sugar market is being driven by developing food processing industries which include synthetic sugar as a raw material in the production. For instance, in 2019, Indian Government inaugurated a food processing plant at Dewas city in 51 acres of land at the cost of USD 20.22 million. Another important driving factor is the growing prevalence of chronic diseases such as blood pressure and diabetes due to which people prefer to consume less harmful sweeteners for taste enhancement. For instance, in 2019, diabetes caused direct deaths of 1.5 million people worldwide. Furthermore, the rising awareness about availability of sugar alternatives, positive influence of social media and increasing health-conscious consumers around the world who prefer products with less calories create new opportunities for the global Plant Derived Sugar and Synthetic Sugar industry.

However, high prices of these products and negative health effects of synthetic sugar may impede market growth over the forecast period of 2021-2027.

The regional analysis is based on the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World for the global Plant Derived Sugar and Synthetic Sugar Market. Asia-Pacific is the leading region across the world in terms of market share and is also anticipated to exhibit the highest CAGR over the forecast period 2021-2027 due to the growing demand for ready-to-eat foods, expansion of confectionary industry, large consumer base, preference for healthy food diet, rising personal income in the region.
