Abstracts

Global Plastic Fencing Market is valued approximately at USD 4.06 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 7.8% over the forecast period 2021-2027. A plastic fence is made using synthetic plastic such as vinyl, polypropylene, nylon, polythene ASA or recycled plastics. The key factor is the shifting consumer preference towards renovation and remodeling in the residential sector. Increased spending on infrastructure in private and public construction is propelling the growth of the market. According to the United States Census Bureau, U.S. construction spending rose to USD 1.3 trillion in the year 2019. But there are certain regulations pertaining to using plastic as plastic is less environment friendly which is a major restraining factor. Also, plastic compared to other alternatives has low physical strength which hinders the market growth. Moreover, technological advancements and product innovations in the plastic fencing market such as pre-woven vinyl fence, reflective fence will provide growth opportunities to the market in the forecasted period.

The global Plastic Fencing market is segmented into key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World for regional analysis. North America is the leading sector in the plastic fencing market because of shifting

preference towards aesthetic appeal in minimum cost. Asia Pacific will grow with a significant CAGR in the forecasted period because of penetration of construction industry. According to Building and Construction Authority (BCA), Indonesia will witness 6% annual growth in the construction sector.
