Global Plastic Fencing Market is valued approximately at USD 4.1 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 4.9% over the forecast period 2020-2027. Plastic Fence is a structure which is used generally outdoor for the purpose of safety and security of a property whether its residential or commercial. Plastic fences are made up of material like plastic composites, polyethylene and vinyl. Some factors which are driving the growth of plastic fencing market are rising security and safety concern, frequently expanding construction industry, , need for sustainable fencing solutions, low maintenance cost and investment by big market players in the form of mergers and acquisition .For instance: In July 2017, CertainTeed Corporation had announced an agreement regarding acquisition of SimTek Fence of Oram, Utah, the later was the leading manufacturer of high-density polyethylene fence products.
