Global Point-to-point Microwave Antenna Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Point-to-point Microwave Antenna refers to physical transmission devices utilized to broadcast microwave transmission between two or more locations. These devices are widely used in radio and communication systems. Point to Point microwave antenna's frequency ranges from 3.6 GHz to 86.0 GHz. The growing number of smart devices worldwide and rising technological advancements in communication systems as well as recent product launches from leading market players are factors that are accelerating the global market demand. For instance, according to Statista – in 2020, number of Internet of Things (IoT) devices worldwide were estimated at 9.7 billion, and this number is projected to reach to 29 billion by 2030. Further, China would be at the first position with 5 billion IoT devices. Furthermore, leading market players are coming up with innovative products to leverage the growing demand for Point-to-point Microwave Antenna. For instance, in March 2022, Huawei unveiled its new microwave solution for 50 Gbps E-band. The new solution is intended for ultra-high bandwidth requirement of the dense urban areas. The transmission range of E-band is said to be 50% higher than the industry average. This

new antenna would offer enhanced transmission range by 50%, from 3.5 km to 5km, which makes it ideal for urban areas. Also, growing investment towards advanced communication infrastructure and rising technological advancements in the automotive sector are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, stringent government policies and regulations impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Point-to-point Microwave Antenna Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing investment towards communication and satellite infrastructure and presence of leading market players.
