Global Polyamide Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Polyamide is a type of polymer with the repeating units linked by amide bonds. Polyamide can be found both naturally and chemically. Proteins, such as wool and silk, are examples of naturally occurring polyamides. The increasing demand for polyamide has led the adoption of Polyamide across the forecast period. Furthermore, increase in technological advancement and product innovation leads to grow the market for the forecasted period. For instance, in 2020, BASF India which is a chemicals manufacturer and a subsidiary of BASF SE, approved its merger decision for acquiring BASF Performance Polyamides India. And this is expected to support the company in expanding its materials segment and extend and strengthen its position for key industries. Also, with the increasing need for lightweight materials in the automobile and transportation sectors leads to the adoption & demand for Polyamide is likely to increase the market growth during the forecast period. However, volatility in the price of raw material might impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Polyamide Market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the leading region across the world in terms of market share owing to the growing demand for key market players for automotive, consumer goods, electrical and electronics, and textile in the region for the forecasted period. Whereas, North America is anticipated to

exhibit highest growth rate over the forecast period 2022-2028. Factors such as rising purchasing power of consumer, and major market of raw material in the region would create lucrative growth prospects for the Polyamide market across Asia-Pacific region.
