Abstracts

Global Polycarboxylate Superplasticizer market is valued approximately at USD 9.16 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 8% over the forecast period 2020-2027. Polycarboxylate superplasticizer is the third-generation concrete superplasticizer that possesses unique features of excellent water-reducing rate, high strength and compactness, good low viscosity, convenient operation, good self-leveling and environmentally friendly etc. It is widely used in high-resistance concrete, flowing concrete, self-compacting concrete, concrete pumping, high-grade concrete and high-performance concrete. Rising spending on public utility infrastructure such as bridges, pavement, subways, tunnels, etc. are the driving factors. According to Statista, In 2017, infrastructure expenditure in the construction industry was around nine per cent of the country 's GDP Growing demand for commercial concrete can be considered as opportunity factors. Polycarboxylate superplasticizers are used in high-performance concrete, high-resistance concrete, high-volume fly ash / slag concrete, cement grouting and dry mortar which can be the opportunity factors for the market. This sector had an FDI equity inflow of about U.S. dollars in 2019. With more than 90 merger and acquisition deals in 2017, the sector's investments were estimated to continue. Complications related to transportation and stringent regulations imposed by governments regarding the proper use of superplasticizer are restraining factors.

The regional analysis of Global Polycarboxylate Superplasticizer market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and

Rest of the World. Geographically, Asia Pacific is expected to emerge dominant and drive advances in the global superplasticizer concrete market. The demand for concrete superplasticizers is expected to gain momentum in Asia Pacific over the coming years, due to the robust increase in construction activities and the expansion of infrastructure. In the Middle East and Africa and North America, the use of concrete superplasticizers in civil infrastructure is expected to further drive the market.
