Abstracts

Global Polyester Staple Fiber (PSF) Market is valued approximately at USD XX Million in 2020 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2021-2027. Yeast is a single-cell microorganism which can grow with or without oxygen. Yeast is widely used in industries such as food and beverages, ready-to-eat products and bakery items. Yeast accelerates the fermentation process as well as enhance the quality, aroma, texture and flavor of the product. Growing demand for bakery products and rapidly growing food and beverages market around the world is fueling demand for yeast. Such as, according to Statista, market size of food and beverages industry in India has increased from USD 22.38 billion in 2016 to USD 30.76 billion in 2018 and reached USD 45.97 billion by 2020. Also, rising alcoholic consumption, increasing preference for ready-to-eat food products and government support for food processing industry are expected to create lucrative demand for yeast in coming years. In March 2021, government of India approved PLI (production linked incentive) scheme for the food processing industry by entailing an outlay of USD 1.45 billion. However, raw material shortage and stringent government regulation are poised to hamper growth in near future.

Europe is leading the market in terms of revenue among Asia Pacific, North America, Europe, Latin America, and Rest of the World, owing to growing application scope in

food ingredients and additives and growing research and development activities. Whereas, Asia Pacific is expected to exhibit highest growth rate during forecast period, due to growing population which is resulting in rising demand for food and beverages and bakery products.
