Abstracts

Global Polyetheramine Market is valued approximately at USD 752.53 million in 2018 and is anticipated to grow with a healthy growth rate of more than 9.3 % over the forecast period 2019-2026. Polyetheramines are the chemicals formed during the reaction between amino terminated polyether with polypropylene glycol . The chemical is used in the production of plastics, polyurea coatings, reaction injection modeling (RIM) and adhesives. These are also used as curing agents for epoxy resins to enhance the performance of fuels, concrete, and pesticides. Hence, the material is mainly used as performance enhancers of epoxy system which are used in industrial and decorative coatings and sports equipment. Further, the growth in the industries mainly wind energy industry, construction and building industry has led the adoption of Polyetheramine across the forecast period. Also, the versatility and unique physical properties of the chemical fuels the market growth. Although the poor response from ultraviolet–visible (UV/VIS) hinders the market growth. However, the growing importance of polyetheramine cured rubber like epoxy asphalt composites is a wide opportunity for the market.

The regional analysis of global Polyetheramine market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is the leading/significant region across the world in terms of market share owing to the increasing purchasing power and the demand from the end use industries specially the power & Energy, aerospace and automotive industries. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period

2019-2026. Factors such as expanding cement additives and acid neutralization industries in the region mainly China and India would create lucrative growth prospects for the Polyetheramine market across Asia-Pacific region.
