Polyglycerol esters are a class of food emulsifiers used extensively within the food industry because of their amphiphilic nature in various types of food. The corresponding polyglycerol esters are produced from polyglycerol and fatty acids in a direct esterification of triglycerides and polyglycerol. The emulsifiers are of the non-ionic type and exhibit a broad range of polarity or hydrophilic-lipophilic balance (HLB) values, ranging from 6 to 11, compared with many other food emulsifiers. The broad range of HLB values of the polyglycerol esters makes them a versatile emulsifier for food applications. Increasing consumption for food production is one of the major factors responsible for high CAGR of the market.
