Abstracts

Global Polymer Coated Fabrics Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Polymer coated fabrics are synthetic materials. Further, on these fabrics coatings of different polymers like polyurethane, polyethylene, etc. are applied. Polymer coated fabrics widely used in transportation and protective equipment segments due to their waterproof, UV resistant, abrasion and durable properties. Growing transportation industry and rising adoption of protective equipment's in end use industries are key drivers for the growth of Polymer Coated Fabrics market. For instance, according to India Brand Equity Forum (IBEF)- in Union Budget 2021, the government has allocated the infrastructure USD 32.02 billion to enhance the transport infrastructure. The government has expanded the 'National Infrastructure Pipeline (NIP)' to 7,400 projects. Approximately 217 projects worth USD 15.09 billion were completed as of 2020. Through the NIP, the government invested USD 1.4 trillion in infrastructure development as of July 2021. Furthermore, as per American Trucking Associations (national trade association for the trucking industry)- in 2020 gross freight revenues from trucking in US marked USD 732.3 billion, accounting for 80.4% of the

nation's freight bill in 2020 and around 10.23 billion tons of freight transported by trucks in 2020, which accounts for 72.5% of total domestic tonnage shipped. Also, with the increasing penetration of personal vehicles ownership and rapid Industrialization in Emerging Economies, the adoption & demand for Polymer Coated Fabrics is likely to increase the market growth during the forecast period. However, availability of substitutes and rising environmental consciousness impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Polymer Coated Fabrics market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is the leading region across the world in terms of market share owing to growing transportation sector and presence of leading market players in the region. Whereas Asia-Pacific is anticipated to exhibit highest growth rate over the forecast period 2022-2028. Factors such as increasing penetration of global automobile players and increasing adoption of personal vehicles in the region would create lucrative growth prospects for the Polymer Coated Fabrics market across Asia-Pacific region.
