Abstracts

Global Polyols and Sorbitols Products Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Polyols also known as sugar alcohols are types of carbohydrates that have a group of alcohol attached to each carbon. Various polyols, such as glucitol, xylitol, and maltitol, are used to provide sweet taste in food. Polyols also have application in other applications such as Industrial Insulations, Footwears, Transportation, Construction, Packaging and among Others. Whereas Sorbitols also called a sugar alcohol, or polyol refers to carbohydrate. Sorbitol contains about one-third fewer calories than sugar. Sorbitols stabilizer in pharmaceutical products. Sorbitol is utilized in production of surfactants used in food, cosmetic, dyes and paints. The growing Food and Beverages Industry and increasing end use application of polyols & sorbitols as well as recent product launches are factors that are accelerating the global market demand. For instance, according to Statista - In 2021, the global market for functional foods and beverage was valued at USD 281.14 billion and the market is further estimated to grow at a compound annual growth rate of around 9.5 percent between 2021 and 2028 to reach to USD 500 billion by end of 2028. Furthermore,

leading market players are coming up with innovative products to capitalize rising inclination towards low calorie sweeteners. For instance, in April 2020, Ingredion EMEA unveiled its first polyol sweetener named, ERYSTA Erythritol. The sweetener is intended for manufacturers to achieve nutrition-related claims, such as 'no added sugar' or 'calorie-reduced', in multiple applications. Also, growing adoption of low-calorie food products and increasing burden of lifestyle diseases are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, health effects associated with consumption of sugar-free sweeteners impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Polyols and Sorbitols Products Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing demand for low calorie sweeteners and rising prevalence of lifestyle diseases in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as growing food & beverages sector in the region and increasing penetration of leading market players in the region, would create lucrative growth prospects for the global Polyols and Sorbitols Products Market across the Asia Pacific region.
