Abstracts

Global Pool Tables market is valued at approximately USD 214.1 million in 2020 and is anticipated to grow with a healthy growth rate of more than 5.4 % over the forecast period 2021-2027. A pool table is a cue sports table with a delimited surface. All pool tables in the current period (whether for carom, billiards, or snooker) have a smooth surface constructed of quarried slate, which is covered with cloth (typically a tightly woven worsted wool called baize) and surrounded by rubber cushions, all of which are elevated above the floor. Snooker table and billiard table are more particular titles for individual sports, and different-sized pool balls are utilized in various table types. Pool tables come in a range of sizes, including 9-foot (2.7 meters), 8.5-foot (2.6 meters), 8-foot (2.4 meters), and 7-foot (2.1 meters) (2.1 m). According to the standardized rules of pool in the world, the World Pool-Billiard Association (WPA) and its various regional and national affiliates have only two sizes approved for tournament play by the International Olympic Committee—recognized sport governing body of pool: the 94.5 ft. and 84.5 ft. models. The pool table is rectangular in every case. Moreover, with an increasing number of formal academies establishing throughout the world, the grade of pool facilities continues to increase. The rise in the number of grassroots programs in schools, colleges, and clubs is one of the primary drivers and pool tables market trends driving worldwide pool table sales. World Disability Snooker, the World Women's Snooker Tour, and Cue Zone into Schools, all of which are backed by recognized coaching programs, are gaining traction. The promotion of pool as a sport is further

aided by a number of governing bodies and groups. However, high initial cost of manufacturing of pool tables may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global Pool Tables market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World (ROW). North America is the leading region across the world in terms of market share due to rising consumer purchasing power and a huge number of associations promoting the sport in the region. Whereas Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027 due to growth of e-commerce and organized retail chains and the rising popularity of cue sports in countries such as India.
