Global Portable Coffee Maker Market is valued approximately at USD 2.65 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 7.60% over the forecast period 2021-2027. Portable coffee makers are easy to use and helpful in saving time. The global Portable Coffee Maker market is being driven by growing rising coffee consumption worldwide. For instance: according to the International Coffee Organization, 164530 thousand 60kg bags of caffeine were consumed in 2019, where 166628 thousand 60kg bags of caffeine were consumed in 2020. Another important driving factor for the market growth is the increasing urbanization, as people become busier in their lifestyles, they prefer portable options. Furthermore, the continuous product launches with innovative features and the growing youth population, will provide new opportunities for the global Portable Coffee Maker industry. However, side effects of consuming caffeine and rising prices of the machinery may impede market growth over the forecast period of 2021-2027.

The key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World are evaluated for the regional analysis of the global Portable Coffee Maker Market. Asia Pacific is the leading region and is anticipated to exhibit the highest CAGR over the forecast period 2021-2027 across the world in terms of market share due to growing population, increase in coffee production and busy corporate lifestyles of the
