## **Abstracts**

Global Portable Ultrasound Bladder Scanner Market is valued at approximately USD 119.15 million in 2021 and is anticipated to grow with a healthy growth rate of more than 6.00 % over the forecast period 2022-2028. Portable Ultrasound Bladder Scanner is a portable, hand-held ultrasound device that can be used for performing a quick, easy and non-invasive scan of the bladder. The scanner consists of an ultrasound probe and transducer to reflect sound waves from the patient's bladder to the scanner. The increasing cases of urological disorders and increasing number of urinary tract infections have led to the adoption of Portable Ultrasound Bladder Scanner across the forecast period. For Instance: according to the 2020 publication of the World Journal of Urology, every year approximately 150 million people are affected by CAUTIs (Catheter-associated Urinary Tract Infections). Also, with the rising acceptance and quick expansion of new technologies in emerging economies and rise in research and development activities, the adoption & demand for Portable Ultrasound Bladder Scanner is likely to increase the market growth during the forecast period. However, increase in the overall treatment costs and high cost involved in the initial setup and installation of imaging equipment impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Portable Ultrasound Bladder Scanner Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World.

North America is the leading region across the world in terms of market share owing to the presence of key players in the region and the country's high per capita healthcare spending. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as rapid rise in the geriatric population, rise in research and development activities would create lucrative growth prospects for the Portable Ultrasound Bladder Scanner Market across Asia-Pacific region.
