Abstracts

Global Potassium Citrate Market is valued at approximately USD xxx billion in 2022 and is anticipated to grow with a healthy growth rate of more than xxx over the forecast period 2023-2030. Potassium Citrate, commonly known as tri-potassium citrate, is a citric acid tribasic potassium salt. It is made by mixing citric acid with either potassium carbonate or potassium bicarbonate until effervescence occurs, then filtration, evaporating the solution, and granulating. The market for potassium citrate is driven by increasing demand in the pharmaceuticals and food and beverage sectors, rising health consciousness, and growing demand in personal care products that anticipated to create the lucrative demand for the market.

Moreover, the potassium Citrate is widely used in the pharmaceutical industry as an active ingredient in various medications. It is commonly prescribed for the treatment of urinary tract infections, kidney stones, and as a urinary alkalizer. As the pharmaceutical industry expands and more people seek medical treatments, the demand for Potassium Citrate-containing medications is likely to increase, driving the growth of the Potassium Citrate market. According to Statista in 2023, the global pharmaceutical market has shown remarkable growth. The total market size for 2022 was estimated to be around USD 1.48 trillion, with a slight increase compared to the previous year's valuation of USD 1.42 trillion. Additionally, new product launches and R&D provide lucrative opportunities to the market. However, the high raw material cost of Potassium citrate

stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global Potassium Citrate Market study include Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. Asia Pacific dominated the market in 2022 owing to increasing demand from the food processing industry. Additionally, the rising demand for metal surface treatment, cosmetics, pharmaceuticals, fertilizers, agrochemicals, and detergents in China is expected to further boost the market in the region during the forecast period. North America is expected to grow significantly during the forecast period, owing to the presence of well-established end-use industries and the increasing adoption of potassium citrate. The rising demand for convenient, on-the-go food products and processed meats is a key driver fueling the market's expansion in the region.
