Global Povidone Iodine Market is valued at approximately USDXX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Povidone-iodine also generally known as iodopovidone is highly adopted in antiseptics used for skin disinfection before and after surgery. In addition, it is also used as an antiseptic agent in the manufacturing of antiseptic ointments, scrubs, and gargle solutions. The thriving growth of the pharmaceutical industry, surging demand for the antiseptic agent, and increasing demand for povidone iodine across the healthcare sector are the several factors fostering the market demand across the globe. For instance, as per the Indian Brand Equity Foundation (IBEF), in 2021, the Indian pharmaceutical market is worth around USD 42 billion. Also, it is projected that the market is progressively growing and is expected to reach around 130 billion by the year 2030. Consequentially, the flourishing development of the pharmaceutical sector is accelerating the growth of the Povidone Iodine Market in the approaching years. However, the availability of substitutes and side effects of povidone iodine impede the growth of the market over the forecast period of 2022-2028. Also, the rising significant investments in research and development activities and the introduction of various products by the leading market players are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Povidone Iodine Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the

execution of several stringent norms for the usage of disinfected medical equipment and increasing demand for sterilized equipment from hospitals. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028. Factors such as the growth of the healthcare sector, as well as, increasing expenditure on the medical services, would create lucrative growth prospects for the Povidone Iodine Market across the Asia-Pacific region.
