Global Powder Compacting Pressers Market is valued approximately at USD 305.7 Million in 2020 and is anticipated to grow with a healthy growth rate of more than 3.5% over the forecast period 2021-2027. Powder compacting pressers are majorly used in the production of powder metallurgy parts, carbon & carbide parts, ceramic & cermet parts etc. The global Powder Compacting Pressers market is being driven by rising demand for the Internet of Things (IoT) in automobile production and rising demand from end use industries such as aerospace and military sector various regions. Furthermore, the growing prevalence of second-hand powder compacting presses will provide new opportunities for the global Powder Compacting Pressers industry. For instance, according to the International Trade Administration (ITA), China is the world's largest automotive market, with the Chinese government expecting 35 million vehicles to be produced by 2025. According to OICA, Africa produced 776,967 passenger cars in 2018, which rose to 787,287 in 2019, representing a 1.3 percent growth. Also, the number of light commercial vehicles produced in Canada rose by 6.2 percent from 1,348,932 in 2018 to 1,431,904 in 2019. As a result, increased automation will necessitate the use of more powder compacting pressers in the manufacturing of different automobile parts, which will serve as a catalyst for the Powder Compacting

Pressers industry in the future. However, unstable raw material prices and high cost associated with the manufacturing of product, may impede market growth over the forecast period of 2021-2027.

Asia Pacific, North America, Europe, Latin America, and Rest of the World are the key regions considered for the regional analysis of global Powder Compacting Pressers Market. Presence of major players in the region and the rising consumers spending makes North America the leading region across the world in terms of market share. Whereas North America is also anticipated to exhibit the highest growth rate over the forecast period 2021-2027, due to presence of government and private aerospace companies, along with high defense expenditure in the region.
