## **Abstracts**

Global Power Tools Market is valued at approximately USD 31.08 billion in 2022 and is anticipated to grow with a healthy growth rate of more than 7.20% during the forecast period 2023-2030. Power tools are specialized mechanical devices designed to perform a variety of tasks with increased efficiency and precision, often powered by electricity, batteries, or compressed air. These tools are instrumental in construction, woodworking, metalworking, and other industrial applications, offering significant advantages over traditional manual tools. The Power Tools Market is expanding because of factors such as rising industrialization and construction activities, the rising trend of do-it-yourself (DIY) activities and rising expansion in the automotive industry.

The growth of industrial and construction sectors globally plays a significant role in driving the demand for power tools. As infrastructure development and construction projects increase, there is a corresponding need for efficient and high-performance tools to expedite tasks resulting in market growth. According to Statista, global expenditure in the construction industry amounted to USD 12 trillion in 2019, experiencing an increase to USD 12.9 trillion in 2021. Projections suggest a further rise to USD 19.2 trillion by 2035. This upward trajectory in construction spending signifies an escalation in construction projects, contributing to the overall growth of the market. In addition, increasing technological innovation and rising demand for power tools in industrial applications are creating new opportunities for market growth. However, the high cost of power tools and limited skilled labor stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global Power Tools Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. Asia Pacific dominated the market in 2022. The robust expansion of the automotive sector in countries such as India and China are anticipated to result in the highest Compound Annual Growth Rate (CAGR) in the region throughout the forecast period. The upswing in disposable income and the escalating scale of construction and infrastructure development projects play pivotal roles in propelling this growth. North America is expected to grow significantly over the forecast period. The surge in infrastructure and industrial development within the region is fueling market demand. Furthermore, the substantial presence of key players such as Stanley Black and Decker, Emerson Electric Co., and Apex Tool Group is bolstering the region's revenue share. Additionally, the scarcity of affordable labor is promoting the uptake of do-it-yourself (DIY) tasks, thereby fostering regional growth.
