Abstracts

Global Presbyopia Market is valued at approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028. Presbyopia is a condition in which an individual's eyes lose their ability to focus on nearby objects. The growing investment in healthcare infrastructure, rising number of geriatric populations, and increasing incidences of presbyopia are primary factors contributing to the market growth on a global scale. For instance, as per the Department of Economic and Social Affairs, in 2019, the global population aged 65 and more is accounted for around 703 million. Also, the number of elderly people is expected to increase to 1.5 billion by 2050. Therefore, the geriatric population is more prone to vision loss and aging adults (age 40 or more years) are offering various growth prospects to the market, which stimulate the market growth across the globe. However, the dearth of skilled professionals and unavailability of advanced healthcare infrastructure in emerging economies impede the growth of the market over the forecast period of 2022-2028. Also, the rising investment in the advancing of innovative technologies and increasing research and development activities are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Presbyopia Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing spending on healthcare facilities, along with increasing investment in technological developments for advanced presbyopia treatment. Whereas, Asia-Pacific is anticipated to exhibit the

highest CAGR over the forecast period 2022-2028. Factors such as the increasing geriatric population, as well as, rising availability of better healthcare facilities, would create lucrative growth prospects for the Presbyopia Market across the Asia-Pacific region.
