Abstracts

Global Preterm Birth Diagnostic Test Kits Market is valued approximately USD xx billion in 2020 and is anticipated to grow with a healthy growth rate of more than xx % over the forecast period 2021-2027. Preterm birth, also known as neonatal birth, occurs when a baby is born before the 37th week of pregnancy. Preterm birth diagnostic tests are widely used to prevent and manage premature births, which is driving the market for preterm birth diagnostic test kits to rise. The factors driving the growth of this market are the ever-increasing high birth rate in developing and developed countries, the rising prevalence of premature births, technological advancements in preterm birth diagnostic tests due to heavy investments in research and development activities, and government initiatives to increase neonatal survival rates. According to UNICEF (United Nations International Children's Emergency Fund) figures, around 2.5 million children died in the first four weeks following birth around the world in 2017. In 2017, there were approximately 115.4 million births, with 11.1 percent of those being premature, or around 12.8 million births. However, high premature birth investment, high entrance barriers owing to regulatory compliances, a lack of technical competent staff, and inadequate neonatal care accessibility, particularly in developing nations, are all factors

that could stifle business growth. Moreover, high birth rate in developing countries such as India, Brazil, China, and Other offers opportunities during the forecasting years.

The key regions considered for the global Preterm Birth Diagnostic Test Kits market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading/significant region across the world in terms of market share owing to the increasing high birth rate in developing and developed countries, the rising prevalence of premature births. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2021-2027.
