Abstracts

Global Proactive Services Market is valued approximately USD 3.54 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 21.5% over the forecast period 2022-2028. Proactive customer service is anticipating the customer needs as well as actively reaching out with solution, whether that is by communicating a potential problem which is cropped up, or by allowing customers to self-service issue. High costs incurred by unplanned outages, increasing focus on delivering enhanced customer experience and growing number of cyber threats has led the adoption of Proactive Services across the forecast period. For Instance: in November 2021, according to Palo Alto Networks, enterprise software manufacturer Zoho was targeted by hackers, possibly of Chinese origin, who exploited a vulnerability in its self-serve password management tool ManageEngine from late September to early October. Similarly, in May 2019, the confidential details of 885 million people, including bank account records, social security numbers, wire transactions, and other mortgage documentation, were

apparently exposed by First American Financial Corporation. Also, Ai-Based Proactive Services and Partnerships and Affective Ecosystems increases the adoption & demand for Proactive Services which is likely to increase the market growth during the forecast period. However, managing security with multiple customer touchpoints, and lack of skilled professionals impedes the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Proactive Services Market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the growth in investment by various government authorities into various technologies such as Artificial Intelligence (AI), Machine Learning (ML) and , advanced data analytics. Whereas, Asia-Pacific is anticipated to exhibit highest growth rate over the forecast period 2021-2027 due to factors such as expanding service sector and rising number of startups.
