Global Product Information Management Market is valued approximately at USD 8.02 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 12.2 % over the forecast period 2020-2027. Product Information Management comprise of series of processes and tools which assist in centralizing and managing an e-commerce business product information to ensure a simple, accurate view of product data. The product information market will see a rise in demand owing to the popularity of e-commerce platforms, since mobile data penetration and consumer demand has soared, the e-commerce platform has seen a rise in the number of users and hence with it comes the need to manage the data acquired through the customers. In a report by United Nations Conference on Trade and Development (UNCTAD), in April 2018, e-commerce sales hit \$25.6 trillion globally. With the global expansion of e-commerce platforms, the demand is set to grow exponentially. In June 2020, Winshuttle partnered up with ABBYY, a digital intelligence company to help organizations and businesses in digital transformation, which involves extracting data from physical documents and automatically loading it into SAP. However, data breaches and data theft has forced the government and the concerned authorities to take strict actions to ensure that companies provide data security hence, companies need to comply with Global Unique Identification Database (GUID), Government e-Marketplace (GeM). These may act as a restraint and hamper the growth of product information management.

The regional analysis of global Fitness Equipment market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the

World. North America is the leading/significant region across the world in terms of market share owing to growing reliance upon e-commerce platforms to fulfill the demand.
