Abstracts

Global Public Safety Drones Market is valued approximately USD XX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2020-2027.. Public Safety Drones are small unmanned aircraft vehicles (SUAVs) used in the fields of public safety and emergency by the government. They are a subset of the market for commercial drones and the greater market for unmanned aerial vehicles (UAV). In the Bard College Center for Drone Study's most recent report on public safety drones (May 2018), the group estimated that at least 910 U.S. state and local police, sheriff, fire and emergency service agencies have obtained unmanned aerial vehicles. The increasing demand for public safety drones because of its use in agriculture, oil/gas, real estate, government, transportation, entertainment and media, telecommunications, and mining. is the driving factor. Drone Industry Insights projects the global drone technology market will reach 43.1 billion dollars by 2024, up from 14.1 billion dollars in 2018. Emerging technology fields and engagement models is the opportunity factor. According to Goldman Sachs Research, they anticipate a \$100 billion market opportunity for drones between now and 2020, helped by growing demand from the commercial and civil sectors. The restrictive factors are government regulations and usage restrictions, decreasing professionalism, non-licensed hobbyists and their customers developing internal expertise.

The regional analysis of global Public Safety Drones market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia-Pacific is forecast to grow more rapidly in the forecast period due to strong
