Abstracts

Global PVD Coating Services market is valued approximately at USD 18.9 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 6.1% over the forecast period 2020-2027. Physical vapor deposition (PVD) describes a variety of methods of vacuum deposition that can be used for making thin films and coatings. PVD is an eco-friendly technology in contrast to other chemical depositing methods and involves no hazardous material and does not generate chemical waste or pollution which are the growth opportunities for the market. Increased demand for medical equipment and preference for PVD over other coating techniques are the main driving factors. As per Statista, "In 2018, medical device production worldwide is expected to reach a value of approximately 786 billion U.S. dollars." Hexavalent chromium in electroplating due to its hazardous effects on environment. This restriction has shifted the industries towards Physical Vapor Deposition which is the restraining factor.

The regional analysis of PVD Coating Services market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. In subsequent years, especially in China, the Asia-Pacific will also be occupying fast-growing regions of India and Southeast Asia for more market share. North America will still play an important role, particularly the United States, which cannot be ignored.
