Global Radiation Protection Apron Market is valued approximately USD XX Million in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2028.

Radiation protection apron is a wearable medical garment that is designed to shield from the harmful radiation and offers them convenience to complete their work with maximum safety, comfort, and flexibility. The increasing number of trained radiologic technologists, rising need for radiation protection apron during orthopedic and spine surgeries, growing safety awareness among people working in radiation-prone environments, and rising number of PET/CT scans are the significant factors that are likely to stimulate the market demand around the world. In addition, rising incidences of cancer, coupled with the new product launch by the leading market players will further leads the market development in the impending years. For instance, in July 2018, 3D Dental launched company's new product line for X-Ray aprons. These aprons offer patient safety and are also used with CE certified lead core material quality to meets and American Society for Testing and Materials (ASTM) standards for radiation protection and IEC 61331-1:2014 standard. However, unavailability of mandate policy for using lead aprons during dental X-ray procedures impede the growth of the market over the forecast period of 2022-2028. Also, the increasing usage of nuclear medicine & radiation therapy is anticipated to act as a catalyzing factor for the market demand during the forecast period.

The key regions considered for the global Radiation Protection Apron Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the availability of advanced health care facilities and increasing spendings for the healthcare infrastructure development. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2022-2028.
