## **Abstracts**

Global Rangefinder Market is valued approximately at USD 2.39 Billion in 2020 and is anticipated to grow with a healthy growth rate of more than 21.91% over the forecast period 2021-2027. Rangefinders are generally used in gun or cameras to identify the distance of the target. The global Rangefinder market is being driven by growing modernization in defense equipment to enhance the forces capability. The other driving factor for the market growth is the increase in the introduction of new products with inbuilt rangefinders. For instance, in June 2021, DOOGEE Company launched the new smartphone, the S97 Pro with professional laser rangefinder. Also, in 2021, Xiaomi introduced the Duka LI1 Laser Rangefinder on the Youpin platform with advanced features such as high-precision measurement, HD LED screen and others. Furthermore, the rising sports tournaments which need the Rangefinders such as Golf, increasing demand for high precision equipment in industrial processes and technological advancements will provide new opportunities for the global Rangefinder industry. However, high research & development related to manufacturing of Rangefinder may impede market growth over the forecast period of 2021-2027.

The major regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World are considered for the regional analysis of the global Rangefinder Market. North America is the leading region across the world in terms of market share and is also anticipated to exhibit the highest CAGR over the forecast period 2021-2027 due to increasing adoption of advanced technologies in the defense operations, presence of large established companies, high occurrence of golf tournaments in the region.
